**1. Description of the locations where traffic control signal phot violation-monitoring systems are used**

The Chart to the left lists all of the Red Light Camera locations by approach.

Per the enabling legislation and Common Council Ordinance, the City is authorized to place red light cameras at upto twenty (20) intersections.

If each intersection had four (4) approaches the City could install upto 80 red light cameras with one (1) camera detecting each approach.

After examining the number of approaches at each intersection and working with the City's contractor, GATSO USA, it was determined that thirty-five (35) approaches at the maximum twenty (20) intersections would receive Red Light Camera enforcement equipment

The number of cameras, location, approach direction and date the camera equipment started enforcement mode is listed.

**Number of Violations Captured by Approach at each intersection per camera approach for the Month of July 2016**

**3. Number of Violations recorded at each intersection where traffic control signal photo violation-monitoring**

The violations report represents violations capture by GATSO during the dates listed at the top of the spreadsheet. These violations are reviewed by GATSO staff through three separate reviewviews prior to electronically sending the verified violations to APD for review and either affirmation or dismissal by APD Officers. Violations are reviewed daily by GATSO staff and sent to APD. There is an approximate 4-7 day lag between captured potential violations and actual sending to APD for review.
